INNOVATIONS

Francesco Mendini

# Design & Designers

Snowsound acoustic performance takes shape in projects by great designers. Many shapes and colors are designed to be a visible and distinctive part of the project or to discreetly integrate into the space. Our objective is to resolve acoustic problems, from the simplest to the most complex, with a complete range of products based on a totally innovative approach.

**BAFFLE DESIGN: MARC SADLER** 

Panel with polyester internal padding with Snowsound® technology variable density. Polyester covering in Trevira CS® Fabric. Equipped with kit for ceiling suspended panels. Panel can be hung in either horizontal or vertical orientation. Cylindrical fasteners to be positioned alongside top edge of the panel.

- Polyester internal padding with Snowsound technology, polyester covering in Trevira CS®

- Single material and 100% recyclable
  Eco friendly Greenguard Gold
  Durable, tackable double-sided surface
  Patented variable density composition
  Class A sound absorption with NRC 1.0 (ISO 354/ASTM C423/ISO 11654)
  Absorbs 94% of human speech frequencies
- Class A fire and smoke safety (UL 723/ASTM E84) CAL 133, 117 pass Sleek profile at only 1.4" thick

- Ceiling suspendedCE certified for ceiling application

DESIGN: MARC SADLER

DESIGN: KING AND MIRANDA

NEW

#### **BOW**

What King & Miranda created for Snowsound is a system of modular sound-absorbing elements, inspired by the shapes of the hulls of ships. The Bow product family consists of two elements, each of which boasts a sculptural, raised profile that creates an air gap between the panel and the wall. This gap, and the patented Snowsound acoustic technology of the panel, increases the acoustic performance significantly; it serves as a sound trap. Bow's two shapes—Hourglass and Shield—are modular, complementary, and can be nested together like precisely machined puzzle pieces. Hourglass and Shield become forms that can be combined into infinitely intriguing compositions. Give your creativity a voice with an acoustic solution that looks as exquisite as it sounds.

- Polyester internal padding with Snowsound technology, polyester covering in Trevira CS® fabric
- Single material and 100% recyclable
- Eco friendly Greenguard Gold
- Patented variable density composition
- Class A sound absorption with NRC 1.0 (ISO 354/ASTM C423/ISO 11654)
- Absorbs 94% of human speech frequencies
- Class A fire and smoke safety (UL 723/ASTM E84)
- CAL 133, 117 pass
- 3D dimensional composition with sleek profile. Max panel thickness 1.4".
- Wall mounted

**CORNER DESIGN: MARC SADLER** 

#### **CORNER**

The CORNER system uses Snowsound® patented acoustic panels to divide work spaces by creating a visual barrier while optimizing acoustic comfort. The ultra-thin 35 mm panels are coupled with desk mounting hardware that seamlessly connects the panel's "corners". This system can be retrofitted to existing spaces or specified as an architectural element in the design phase.

#### **FLAP CHAIN**

FLAP CHAIN is an infinitely modular ceiling suspended frame application for the FLAP and FLAP GRANDE panels. Complete with chrome-plated rod and cable height adjustment system, the FLAP CHAIN application suspends the panels in various designs. Equipped with Kit for the ceiling fixing composed of: ceiling plate with 2 holes and steel cable. The panels can be tilted in any direction and can rotate 360 degrees.

## FOR ALL PANEL SIZES, SPECIAL ORDER COLORS REQUIRE:

- Minimum order quantity
- Lead time up to 10-12 weeks

### **OVERSIZE (WALL MOUNTED)**

The OVERSIZE system is characterized by the large size acoustic panel proportion made with Snowsound® technology. Panels are wall mounted with invisible hardware: sturdy metal back frame that affixes directly to panel and hangs from a horizontal metal cleat.

### **OVERSIZE (DESK MOUNTED)**

The OVERSIZE system is characterized by the large size acoustic panel proportion made with Snowsound® technology. Panels are attached to the desk edge using clamp brackets in either a silver or matte white finish.

- Polyester internal padding with Snowsound technology, polyester covering in Trevira CS®
- Single material and 100% recyclable
  Eco friendly Greenguard Gold
- Durable, tackable double-sided surface
- Patented variable density composition
- Class A sound absorption with NRC 1.0 (ISO 354/ASTM C423/ISO 11654)
- Absorbs 94% of human speech frequencies

- Class A fire and smoke safety (UL 723/ASTM E84)
- CAL 133, 117 pass
- Sleek profile at only 1.4" thick
- Wall mounted
- Work surface mounted

- Wall mountable

#### **SNOWSOUND ART**

The journey began in 2017 with a collection of Snowsound sound absorbing panels that have become "canvases" on which are reproduced a series of drawings by Gillo Dorfles, painter, art critic, theorist, historian, considered one of the greatest art scholars in the world. It continued in 2018 with works by Gio Ponti, one of the masters of Italian and international design and architecture, and in 2019 with Sezgin Aksu, designer and artist. For this dual value, Asku was involved in the Snowsound Art project, for which he created a series of works to be reproduced on the panels of the Giotto Collection he designed. 2020 Alessandro Mendini Ideas, Things artwork serves as an example of how a dialogue between art and industry is necessary and should be the basis for any mass-produced product.

- Polyester internal padding with Snowsound technology, polyester covering in Trevira CS®
- Single material and 100% recyclable
  Eco friendly Greenguard Gold
- Durable, tackable double-sided surface
- Patented variable density composition
- Class A sound absorption with NRC 1.0 (ISO 354/ASTM C423/ISO 11654)
- Absorbs 94% of human speech frequencies

- Class A fire and smoke safety (UL 723/ASTM E84)
- CAL 133, 117 pass
- Sleek profile at only 1.4" thick
- Wall mounted
- Ceiling suspended

#### **CLASP WALL / CEILING**

In the CLASP WALL and CLASP CEILING, the Snowsound Fiber acoustic textiles is fixed to simple steel buckles. The textile panel can be easily removed from the structure thanks to a hidden system in the upper edge, while the lower edge houses a chrome-plated steel rod fixed with two visible chrome-plated pins. CLASP can be hung from the ceiling or fixed to the wall. The fabric is supported by a chrome-plated metal frame, available in the wall version and on cables fastened to the ceiling with a height adjustment mechanism. The fabric slipcover is removable.

**DUNES DESIGN: FELICIA ARVID** 

NEW

#### **DUNES**

Dunes is a wall-applied acoustic solution consisting of two layers of Snowsound Fiber Boucle Textiles: one of which serves as a flat base backing and the other as a threedimensional sound-absorbing pocket created with repeating pleats held by steel clips. Think of Dunes as a three-dimensional tapestry, with amazing acoustic performance that comes from the topographies between the backing fabric and the air pockets in the hollow reliefs of the upper layer of Snowsound Fiber. Dunes blends poetry and function to offer a seductive aesthetic with the unsurpassed acoustic performance Snowsound is known for.

Decorative object made of **Fiber 6 Velvet** polyester fabric. Central core in wood conglomerate. Wall mounting (screws not included).

Steel cable and ceiling attachment equipped with metal ball bearing that allows free rotation of the entire object.

#### **PINNA**

Powder-coated tubular frame with internal core in sound-absorbing polyester and cover in Snowsound Fiber Textiles 3 Melange pleated sound absorbing polyester fabric. Fabric is removable and washable.

- Single material and 100% recyclable
  Eco friendly Greenguard Gold
  Class A sound absorption with (ISO 354)
  Machine washable up to 140 degrees F.
- Class A fire and smoke safety (UL 723/ASTM E84)
  CAL 133, 117 pass
  Wall/ceiling mounted

#### LIST PRICE:

27.3 YARDS: \$5410.00

8.7 YARDS: \$2075.00

#### FIBER 1 ANTIMICROBIAL

The ONE Fabric for Healthcare that's good for you. The industry's only soundabsorbing textile on the market with patented technology that is permanently fire resistant and antimicrobial. The silver ion in the polymer inhibits the growth of bacteria spreading in and on the fiber, keeps textiles fresher for longer, and provides the industry's best acoustic performance.

#### PHYSICAL PROPERTIES

Content: 100% Fire Resistant, Acoustic Sound Absorbing Polyester Fibers with

Patented Snowsound Technology

Backing: Unbacked

Width: 55" // 140 cm (tolerance + 0 - 3 cm)

Weight: 15.0 oz per square yard / 23 oz per linear yard

Thickness: 1.5 mm

#### ACOUSTIC PERFORMANCE AND NOISE REDUCTION RATING

#### **Absorption Coefficient and NRC:**

Class A Sound Absorption per ISO 11654 with NRC 1.0 achievable depending on installation. Please refer to on-line technical sheets for details.

#### PERFORMANCE

#### Flame Resistance:

Passes NFPA 701 // NFPA 260 // CAL. TB 117 // UL 723 Class A // ASTM E 84 Class A

#### **Environment:**

100% Recyclable and GREENGUARD GOLD Certified

#### Abrasion Resistance:

30,000 rubs / cycles (tested according to Martindale Method)

#### Colorfastness to Light:

Grade 7 - "Outstanding" (Passes AATCC 16 / ISO 105-B02:2014)

#### Colorfastness to Crocking:

Wet - Grade 5. Dry - Grade 4/5. (Passes AATCC 8 / ISO 105-X12: 2016)

#### Propensity to Surface Fuzzing and Pilling:

Grade 5 - "no change" (Passes ISO 12945-2:2002)

#### Washing and Maintenance:

Normal machine washing up to 86 degrees Fahrenheit. Ironing on low heat acceptable. Dry cleaning is acceptable (any solvent except Trichloroethylene). Do not tumble dry.

## **TERMS & CONDITIONS**

- 1. This price list cancels and replaces the previous ones.
- 2. The product prices may be changed by the vendor at any moment without prior notice; all prices are not inclusive of installation.
- 3. The yendor reserves the right to alter the construction materials, the technical and visual characteristics and also the dimensions of the products, at its own unquestionable discretion and without any prior notice.
- 4. Product images are purely indicative.
- 5. In addition to the specific terms agreed each time, sale is governed by these general terms, which are considered to be known by the purchaser; any clauses derogating from these general terms of sale must be in writing.
- 6. The purchaser's purchase proposals and/or orders are conditional upon the vendor expressly accepting or starting fulfillment of the agreement, in cases where this is permitted. Any subsequent amendment to the sales agreement will not be valid and binding unless entered in a written document signed by the party being asked to accept this amendment.
- 7. Per F.O.B. orgin, delivery of the goods sold is with remittance thereon to the carrier or forwarder, so that the goods travel at the purchaser's risk and danger; this also applies in cases where the goods are sold free to the purchaser's address. Any other request, complaint and/or action relating to shipment or transport of the goods must be brought by the purchaser directly against the forwarder or the carrier. Any damage, loss or breakage of the goods sold which is attributable to shipment or transport thereof will not exempt the purchaser from liability for payment of the agreed price.
- 8. The delivery time is indicative and not binding; it may be delayed without any obligation of indemnity or compensation of any direct or consequential damages suffered by the purchaser as a result of late delivery and without this leading to termination of the sales agreement due to the vendor's non-fulfillment.
- 9. With the exception of cases of force majeure, in the case of strikes and all other cases which temporarily prevent the vendor from fulfilling the sales agreement properly, the vendor is entitled to withdraw from the agreement, without the purchaser being entitled to claim any damages, except for the repayment in the case of withdrawal, of any amount paid as an advance.
- 10. Payment of the sale price of the products must be made at the vendor's registered office. In the case of late payment, the purchaser will automatically be placed in arrears and will be required to pay interest in the amount and from the time required by Legislative Decree 231/2002 for late payment in commercial transactions.
- 11. The vendor is not liable for any defects of the products known or knowable to the purchaser, who has not immediately refused to accept delivery of the goods. Disputes or complaints over the product quantities must be notified upon delivery, with noting on the relative transport document. Replacement of the product does not signify acceptance of the claim or complaint. The purchaser will only be credited the amount after the faulty products have been returned and provided that the vendor's liability has been recognized or otherwise ascertained.
- 12. The drawings, models, graphs and other technical information on the products being sold, and also samples, catalogs, photographs and similar materials, always remain the intellectual property of the vendor and may not be copied, or transmitted to others, or used in any other way.
- 13. The amounts paid by way of a deposit may be withheld by the vendor if the order is canceled and/or in all other cases of non-fulfillment by the purchaser which justifies the vendor's withdrawal, without prejudice to the right to request fulfillment of the agreement and also the right to demand compensation of greater damages. In contrast, if the purchaser fulfills its contractual obligations, the amounts paid by way of deposit will be allocated to payment of the price; said amounts, and all other advances, will be non-interest-bearing.
- 14. Any tolerance by one of the parties of the other's conduct which breaches the clauses governing sale does not constitute waiving of the rights deriving from the breached clauses nor the right to demand precise fulfillment of all the terms and conditions contained in the sales agreement.
- 15. The vendor maintains ownership of the products until complete payment of the price indicated on the invoice. Up until that date, the products delivered are considered as only held in deposit by the purchaser. The latter therefore accepts the risk of damages to the products deposited attributable to any cause.
- 16. The purchaser is required to inform its own customers and/or final users of the product characteristics, in order to reduce to a minimum the risk of improper use which could expose the vendor to possible claims of damage. In the case of failure to provide this prior information, the purchaser expressly exempts the vendor from any hypothetical liability.
- 17. The seller quarantees the conformity of the products to the specifications indicated in the order confirmation, except for the tolerances considered acceptable in industrial production.
- 18. The seller does not guarantee the suitability of the products for particular purposes and/or special uses, unless specifically requested by the buyer and expressly accepted in writing by the seller with a statement in the relative order confirmation; the buyer must ensure that any specific standards and/or legal requirements are specified in the relative order confirmation of the seller.
- 19. The seller's information regarding specific suitability of the products is purely indicative.
- 20. Any eventual consulting and/or design activity and/or calculation carried out by the seller pertaining products is to be considered purely indicative and represents a simple suggestion concerning products' generic positioning, hence not binding. Each suggested fact must be fully verified by the buyer; the seller assumes no responsibility for the results of such activities.
- 21. Since the applications of the products made by the buyer are beyond the seller's control, the seller is not responsible for the actual use of the products; the seller is not responsible for any damage and/or loss resulting from incorrect or unusual application of the products.
- 22. In consideration of the particularity of Snowsound-Fiber products, although the seller strives to maintain high levels of quality, three defects are acceptable every 27.3 yards on rolls up to 150cm/ 59 inches wide and twice as many defects per roll with a width of more than 280 cm/ 110 inches; the seller reserves the right to discount, for each defect found, a quantity of material considered suitable to compensate for the proven defect. No returns are accepted for products and/or pieces cut to size.
- 23. Cancellation of an order by the buyer is permitted only in exceptional cases and subject to prior written consent from the seller.
- 24. In case of orders containing non-standard products and/or colors, the buyer must purchase the entire production carried out specifically for this purpose.
- 25. Unless otherwise agreed and unless in case of fraud, the seller's liability for the products sold is limited to an amount equal to three times the value of the order confirmation, even in case of severe quilt.
- 26. Milan Court will be the sole court of competent jurisdiction for all disputes which may arise in relation to sale and any actions of amendment and enforcement there of, including those relating to the validity, effectiveness, interpretation, fulfillment and termination of the agreement.
- 27. In any case, before purchasing the products, it is necessary to consult the terms of sale, technical characteristics and furthermore the following:

#### ATTENTION:

- Before installing the products, check the bearing capacity of the wall/floor/surface on which the products will be positioned, ensuring they are suitable for the intended type of user/use.
- The products are not suitable for use by children.
- The products are not suitable for use outside.
- If the products are applied to the wall/floor/surface, they may need to be installed with anchoring devices (not shown in the catalog).
- The products must be assembled and/or installed exclusively by skilled technical personnel, using instruments and tools appropriate for this purpose.
- Carefully read the instructions enclosed with the product before proceeding with assembly and installation, paying particular attention to the warnings and the explanatory drawings; if the instructions are not attached, contact the vendor's technical office.
- Suitable attachment devices must be used to attach the products to the wall/floor/surfaces, which are strong enough to resist the forces generated; in any case, suitable supporting elements to support each individual element must be used.
- In the case of incorrect installation and/or weights exceeding the maximum loads indicated on this price list and/or the instructions attached to the individual products, a situation of danger could be created, the products could collapse, fall and cause damage to people and/or things: never exceed the loads indicated.
- Do not install the product in the case of any doubts over the methods of installation and/or bearing capacity of the wall/floor/surface on which the product is to be positioned.
- Comply with the instructions and compositions shown on this price list; for different compositions and/or further information on the products or installation methods, contact the vendor's technical office.
- Slight color differences between one lot and another have to be considered normal, within the usual tolerances usually accepted for industrial production.
- The authentic text is only in Italian, the translation has the mere purpose of simplifying the reading.
